

# MACS

MOBILE ACUTE CARE SYSTEM

## The Necessary Solution to Effective Bedside Care.

### Quickly Expand Capacity and Capabilities Effortlessly

The Mobile Acute Care System (MACS) is equipped with two twin hook IV poles for fluids and IV pumps; additionally each side can be outfitted with Oxygen, Air and Vacuum outlets and, if needed, portable Vacuum pumps can be added. Two suction bottle holders are included on each side as well as room for an Air or Oxygen blender.

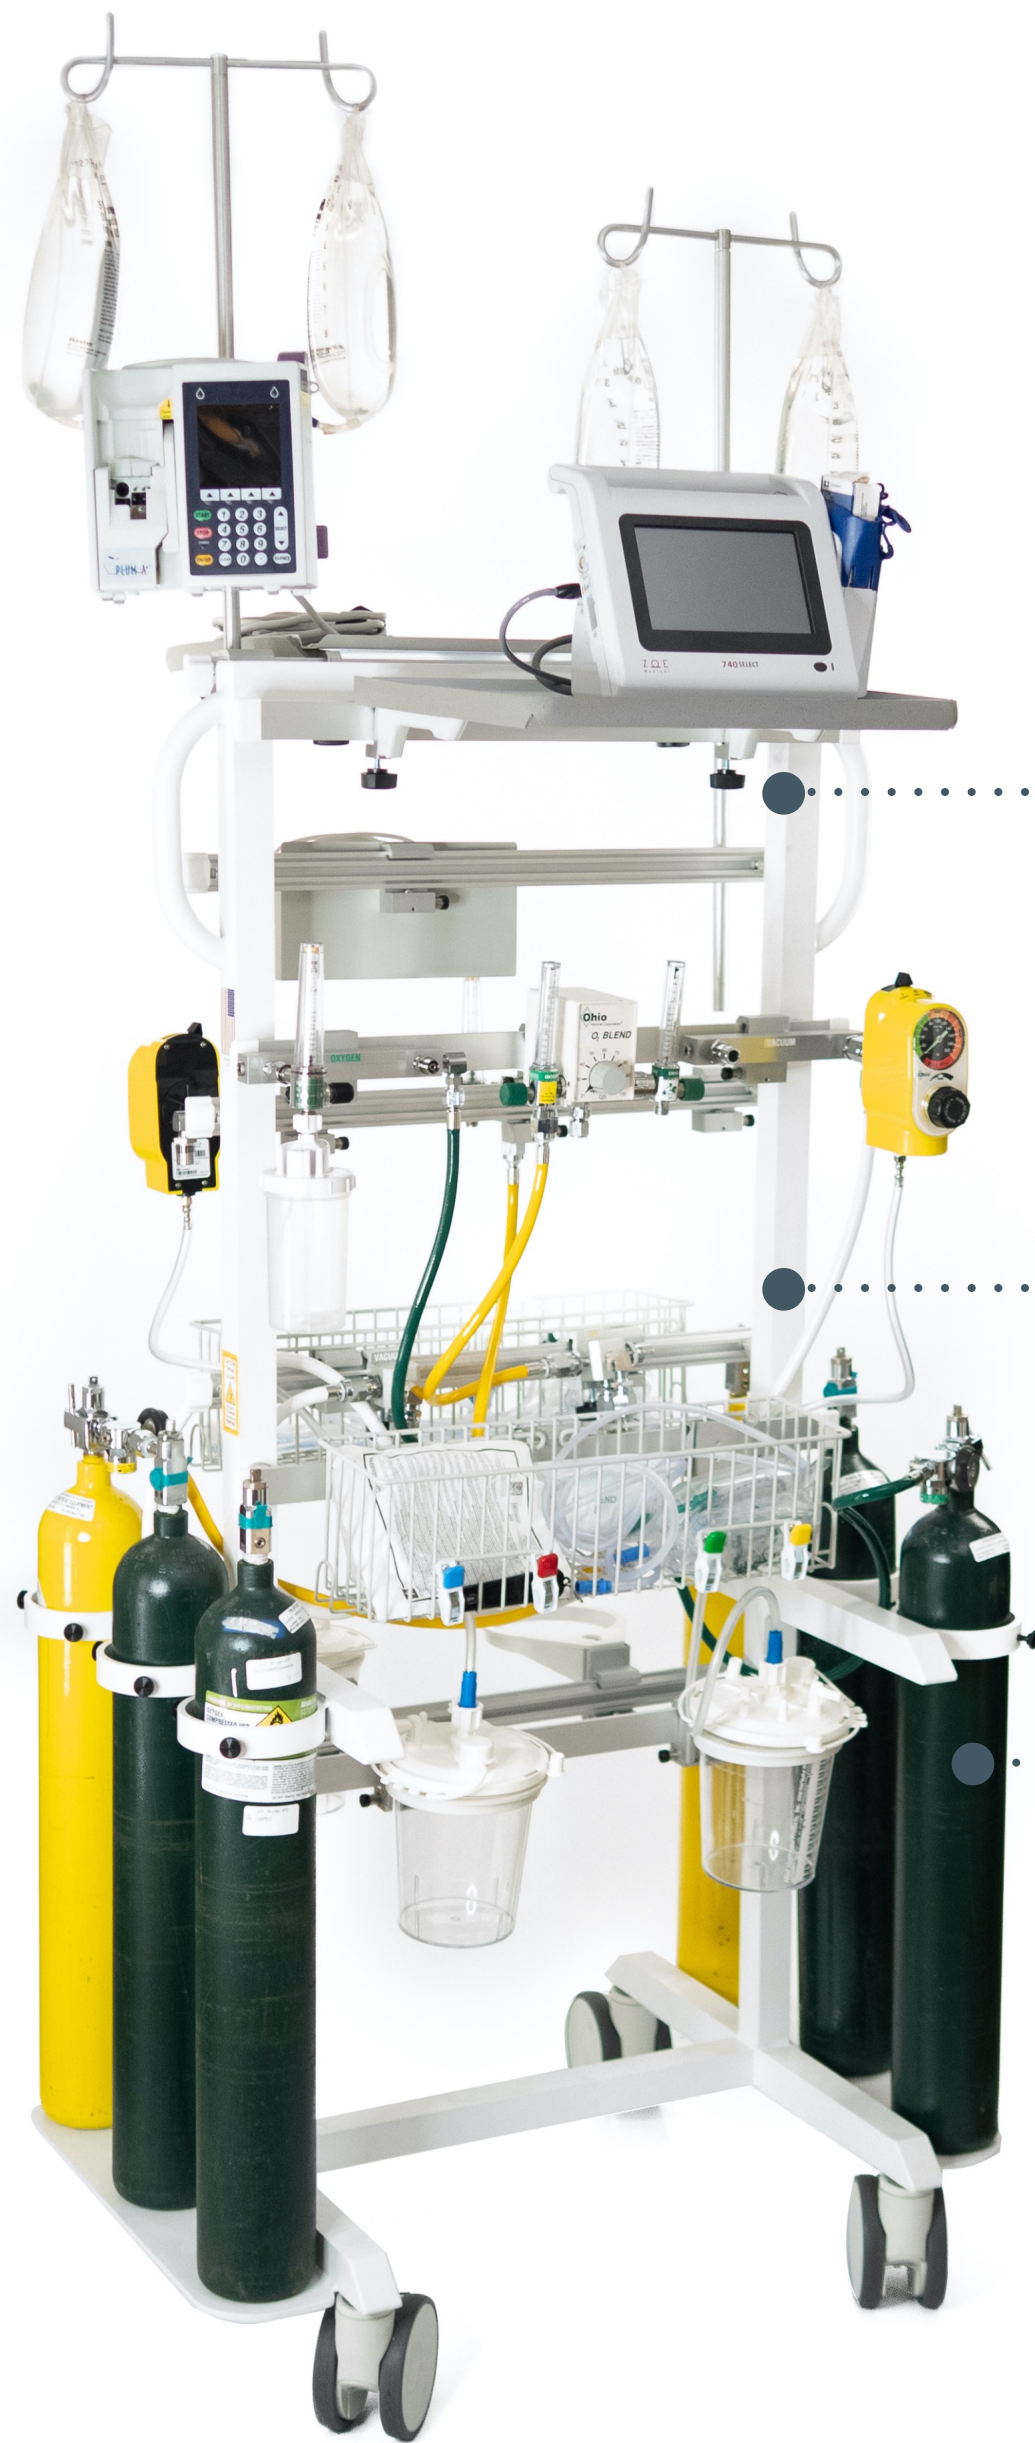

### Make the Most of Your Space

The 16" by 14" shelf is mounted atop the MACS for your patients' vital signs monitoring equipment. The 20 inch wire basket offers a place to easily store PPE material such as gloves, eye ware and gowns. An optional triple glove box holder can be added.

### Ready to Use and Easy to Store

The MACS is shipped, ready to roll out of the box, and when the need passes, it can be stored in the shipping container and put away securely and safely for future use. MACS are super durable, no planned obsolescence, and no service required.

## MACS Key Features

01.

**High grade welded aluminum frame.**

The MACS system's powder coated frame makes for a smooth easy to clean surface.

02.

**Built to fit between two beds.**

Freeing up space for clinicians to gain full access for patient care even in compact spaces.

03.

**Holds a total of six "E" cylinders for Oxygen and Air.**

Allowing staff to maintain therapy with less immediacy to change tanks in areas where oxygen wall outlets are not available.

## Models

Single Bed MACS

Dual Bed MACS
